

Taylor Davis

...not just ANY packaging company!

Delivering tomorrow's requirements today

"Our family business has come a long way since our inception in 1978. Our core values remain the same, providing customers with a friendly, efficient service throughout the UK. This, above all else, has secured our position as one of the largest suppliers of high quality metal and plastic containers at competitive prices.

I hope that we will always be successful in meeting your needs."

Simon Pearce, Managing Director

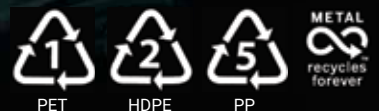

Recycling packaging guide

Reducing waste and using resources more efficiently are long-standing policy objectives for the UK government. There is also growing public and scientific concern about the environmental and health impacts of pollution from plastic packaging, particularly because of plastic litter in the oceans. This is why at Taylor Davis, we want to let you know that all of our packaging is fully recyclable. When metal products reach the end of their useful life, the materials are simply collected and recycled, again and again, with no loss of their inherent properties. Metals are known as a permanent material. Our plastic products are either made of Polypropylene (PP), High-Density Polyethylene (HDPE) or Polyethylene Terephthalate (PET), which are recyclable where facilities exist.

PCR (post-consumer regrind) is a polymer derived from household waste, and rejected industrial materials. This is mixed with virgin polymer to create new containers with a minimum of 30% PCR material, they are completely sustainable and immediately satisfy the exemption criteria from the new plastic tax which began in April 2022.

Throughout this brochure, you will find the recycling logos on each page to identify the materials used to manufacture the products.

Our suppliers are also working towards finding more environmentally friendly raw materials / recycled plastics. Making stronger containers with less material, and wherever possible looking to use bio-degradable materials.

Jokey Plastik

Product Overview

Taylor Davis have successfully sold the leading brand of injection moulded packaging from Jokey Plastik for over 40 years. As their sole UK distributor, our continuing success is built on their innovation, reliability, quality and prime position in the marketplace.

Jokey's packaging provides the best solution for all aspects of the UK filling industry and with all references (round, rectangular, square and oval) including a tamper evident feature as standard, there is really only one choice for the industry professional.

All products are produced in high grade polypropylene and suitable for food and non-food applications.

Jokey's factories are fully accredited to BRC, HACCP and ISO manufacturing standards.

Excellent full colour decoration can be provided both on the bodies and lids across the range, by high quality In-Mould labelling (IML) or Digitally printing.

A range of standard pigmentations are available from stock, but Jokey can also offer hundreds of different colour alternatives, subject to minimum order quantities.

Options available:-

- Popular sizes available in light, medium and heavy weight versions.
- In-mould plastic handles as standard across the range. Hygienic, strong and practical.
- Metal handles on selected items fitted with roller grips for comfort.
- Lids suitable for membrane sealing available across most of the range.
- Items can be manufactured in special polymers in order to pack frozen goods.
- Lids fitted with pull-up spouts for pouring liquids.
- Lids moulded with wet wipe dispenser inserts.
- Two component packs available. (Cuvettes)
- Lids specially designed for paint shaker mixing machines.
- United Nations (UN) solids approval on heavy weight bucket range.

INITIATIVE GREY

Jokey calls upon using recycled plastic.

The Jokey group, which is operating on an international basis, calls upon producers and consumers to prefer packaging made of recycled material. The aim of Jokey's initiative "grey" is to promote recycling more strongly and the reduction of environmental pollution and packaging waste. Jokey recommends producers and manufacturers to support the development by using recycled plastic packaging. Jokey has already produced packaging made of so-called secondary raw material since the 1990's.

Recycled plastic for non-food-packaging (PCR - Post consumer regrind)

Secondary raw material is obtained from recycled plastic waste. It originates from near-household collections, e.g. from the "yellow bin". Secondary raw material cannot be used for food packaging due to hygienic harmlessness. However, the non-food-sector offers a broad range of application: paints and varnishes and also construction chemical goods can be packed in recycled buckets without any problems.

Grey colour – green effect

Recycled plastic is just as sturdy, tight and durable as virgin material. It can be used equally as an advertising medium. The grey material can be decorated excellently with in-mould-labelling or digital printing. The whole container as well as the lid can be fully printed in photorealistic quality. Only the rim of the container cannot be decorated.

All jars are available pigmented or tinted, subject to minimum order quantities.

Some jars are stocked in black or white.

Our manufacturer has the ISO9001:2008 quality system, HACCP and BRC.

Custom moulding is available with reasonable set-up costs.

Other sizes are available: see www.taylor-davis.co.uk for the full range.

Lid options for 70mm and 110mm:

Flat lids / Victorian lids / Induction Heat Seal (IHS) lids.

Gripper Jars come with 63mm Shaker Caps.

Small Plastic Bottles

Plastic Screw Top Bottles

Mainly used for: Liquids, Chemicals, Food Products, Flavourings, Sauces, Detergents, Cleaning Products, Disinfectants, Plant Nutrients, Oils, etc

General Purpose Bottles

Size (ml)	Neck Size (mm)	Box Qty	Fittings
50	20	1500	20mm Wadded cap. Jaysnap cap, CRC cap.
100	20	768	
150	28	630	28mm Wadded cap, Oil Spout, Polytop flip cap, Jaysnap cap, CRC cap and Trigger Spray Head.
250	28	420	
500	28	216	
1000	28	96	

Available in Natural from stock. White also available on some sizes. Otherwise minimum order quantity applies. Fluorinated available in all sizes. We can also offer this range in 100% recycled rHDPE for non-food applications

Wide Neck Bottles

Size (ml)	Neck Size (mm)	Box Qty	Fittings
75	38	532	Wadded, or Wadded tamper evident cap.

250	38	216	
500	38	109	
1000	38	60	
1500	38	40	

Available in Natural from stock. Other colours available subject to minimum order quantity.

Tamper Evident Bottles

Size (ml)	Neck Size (mm)	Pack Qty	Fittings
500	32	140 / 1680	32mm tamper evident cap. Oil spout available subject to min order quantity.
1000	32	92 / 920	

Available in Natural or White.

Trigger Spray Bottles & Heads - 28mm

A variety of sizes available; 500ml, 750ml & 1 litre. Colours include White or Natural with optional PCR. All bottles available are subject to minimum order quantities. Please contact our sales department for more information.

Jerricans

Rectangular Jerricans

Mainly used for: Liquids, Cider, Detergents, Cleaning Products, Disinfectants, Flavourings, Oils, etc.

Rectangular HDPE Jerricans

Available from stock in Natural, with some other colours available. Pigmentation is available subject to minimum order quantity. PCR options are available.

Size (litre)	Pack	Pallet
1.0	180	1440
2.0	48	912
2.5	40	760
4.0	84	504
5.0	72	432

38mm Capping Chuck available from stock

All Jerricans have a 38mm R4 neck, which takes a standard or tamper evident cap. Coloured caps available from stock.

PCR Jerricans example:

38mm Pump Dispenser available from stock

UN Freestanding 5 litre Jerrican

Available in a 130g weight. UN approved to Y1.2. Standard 38mm neck.

Contour Range

An alternative looking bottle to the standard Jerrican range. Options include pigmentation, TDW symbols, Visi-Stripe, Graduations and various weights.

Sizes available in 500ml, 1 litre, 2 litre, 2.5 litre, 4 litre and 5 litre.

All bottles are manufactured to order, with a minimum order quantity.

Stackable Jerricans

Plastic Screw Top Containers

Mainly used for Liquids, Chemicals, Flavours, Essences, Detergents, Cleaning Solutions, Disinfectants, etc.

Size (litre)	Dimensions (w x d x h)	UN Approval	Weight (gramme)	Neck size (mm)

Intermediate Bulk Container

Mainly used for transporting or storing Chemicals, Adhesives, Coatings, Food Products, Water.

Manufactured from High Density Polyethylene and surrounded by a galvanised steel cage. UN approved to Y. Comes with a 150mm opening, and a 50mm outlet at base as standard, other options are a 225mm opening and 75mm outlet.

Pallet options: Plastic or Wood.

Dimensions:

Height 1175mm x Length 1200mm x Depth 1000mm.

Supplied in 1000 litre from stock. Comes in Natural, with options of Black or White.

600 litre size also available.

CurTec Range

UN Approved Open Top Plastic Screw Top

Taylor Davis is pleased to offer the CurTec range of containers. All products are manufactured in food grade material. All sizes are UN approved to Group 1 (X) solids and pastes.

All products are tamper evident, or can be using the security seals. Other colours are available, but may be subject to minimum order quantities. Black and UV safe are also available.

Mainly used for: High value products, Pharmaceuticals, Ingredients, Speciality Chemicals, and Bulk Storage.

* Lids produced in High Density Polyethylene

Solvent Resistant Containers

Our range of Solvent Resistant Containers have made it possible to utilise plastics in applications previously served by metal or glass.

The introduction of carefully controlled levels of fluorine during the blowing process ensures that the containers have an effective barrier to safely store even the most aggressive liquids.

The fluorination process is so effective that it reduces any product permeation or pack degradation.

Mainly used for: Solvents, Chemicals, Food Flavourings, Oils, Automotive Products, Agrochemicals, Fragrances, etc.

Polycans & Nampac Pails

Polycans

Mainly used for: Paints, Coatings, Wood Stains, Adhesives, Resins, etc.

Sizes available: 1 litre / 2.5 litre / 5 litre.

These polycans are manufactured in grey PCR Polypropylene. They are the plastic alternative to tinfoil lever lid tins, suitable for water based products.

Decoration is available subject to minimum order quantities. Handles are standard on 2.5 ltr and 5 ltr sizes.

20 litre Open Top Polypail

Mainly used for: Resins, Adhesives, Coatings, etc.

This robust bucket is manufactured from High Density Polyethylene. It has a UN liquid approval to Y1.5.

The lid is fitted with a gasket. Printing is available subject to minimum order quantities.

Jar Closures / Aluminium Bottles

Jar Closures

We stock a range of twist off tinplate jar closures from the world's leading closure manufacturer.

The twist off provides excellent oxygen barrier performance for a long shelf life. Suitable for hot and cold filling.

Diameters available: 43mm, 48mm, 53mm, 58mm, 63mm, 70mm & 82mm.

Styles available: RTO (Regular Twist off), RTS (Regular Twist off Stepped), RTSB (Regular Twist off Stepped Button).

We stock mainly in gold, with white & black available on some sizes.

Other colours and printing are available subject to minimum order quantities.

Aluminium Bottles

Mainly used for High Value Liquids, Essences and Flavourings. Available from stock internally plain. Can be internally lacquered, and some sizes are UN approved.

All caps are tamper evident, with polyplug caps (except 15mm).

30	6HA1 / X
50	6HA1 / X

25 litre Round Tinplate Drums

These drums come in either a blue or white exterior colour, with a plain interior finish.

They are UN approved to Group 2 (Y). They have 3 neck options: 59mm cap and inner seal or 78mm polyplug cap, or a 57mm pull out spout.

Other exterior colours available subject to minimum order quantities.

*Open Top Steel Kegs

These kegs come in 3 different diameters, 11", 12" & 14". Various heights can be produced to suit customers' own needs (MOQ required). Our standard stock line is 14" x 25" (57 litres).

They can come in either a plain, varnished or lacquered interior finish. Ring band lids come fitted. Drop handles and other options are available, but could be subject to minimum order quantities.

Other exterior colours available subject to minimum order quantities.

Large Steel Drums

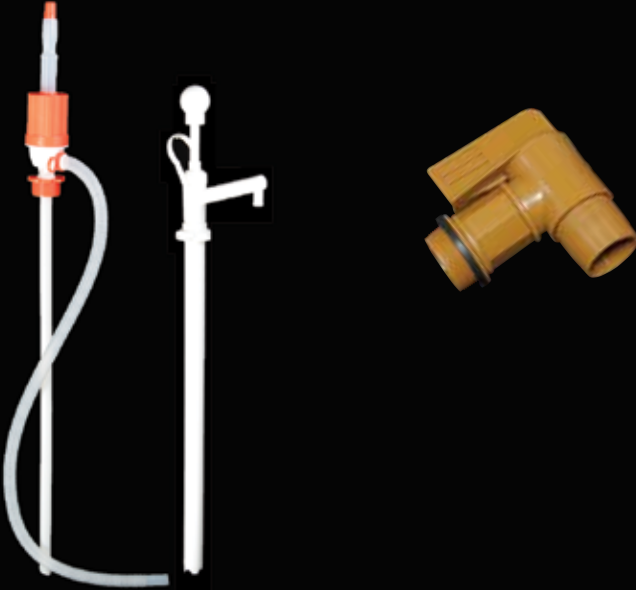

Mainly used for volume packing / storing of: Coatings, Paints, Chemicals, Solvents, Resins. Foodstuffs, Flavourings, Essences are compatible with polylined drums only.

*Tight Head Drums - 210 litre

These drums come from stock in either a plain steel, or lacquered internal finish. They are UN approved to Group 1 (X). They come supplied with a 3/4" and a 2" trisure bung.

Polylined (Composite) - 210 litre

These drums come externally blue with the polyethylene liner. They are UN approved to Group 1 (X). They come supplied with 2 x 2" plastic trisure bungs. Suitable for food products.

*Open Top Drums - 210 litre

These drums come from stock in either a plain, or lacquered internal finish. They are UN approved to Group 2 (Y). They come supplied with a ring clamp and lid fitted with a 3/4" and a 2" trisure bung.

Other colours, gauges and specifications are available subject to minimum order quantities.

*If the internal condition of the drum is critical or you have a product sensitive to the presence of rust, you should consider an alternative since we cannot guarantee any plain steel drum will be completely rust free.

The nature of raw steel is it will deteriorate and it is a matter of time until the internal surface show signs of corrosion.

Individual batches will vary. Internally lacquered finishes are available.

Measuring Jugs

Superior quality professional measuring jugs made from high quality food grade polypropylene. Designed for commercial & industrial use these lightweight and durable jugs are affordable.

Independently lab tested for accuracy, the measurements on the side are both embossed and printed with black ink, ensuring perfect measuring every time.

- Chemical resistant
- Large injection moulded handle makes this jug ideal for thick and thin liquids
- Thick walls and non-drip pouring spout all add to the outstanding quality
- Food grade
- Sizes available: 250ml / 500ml / 1ltr / 2ltr / 3ltr / 5ltr / 10ltr / 20ltr

You can be confident in their rigidity and durability, not chipping like the glass jugs can. Our Pro-Jugs can stand the test of time and be an asset to any application.

Small Orders

TDONLINE

TDOnline is the official Taylor Davis online cartsite that offers a rapid delivery service and specialises with low minimum order quantities. For further information please visit: www.tdonline.co.uk

National coverage - Serving the Nation

With three strategically placed distribution centres, our standard delivery time throughout the UK is 3-5 working days. We are also able to offer a next day delivery service at a very competitive rate, for any orders placed before 12 noon.

Our warehouses are located in the South West of England, near to the M4 and M5 interchange, Warwickshire, near junction 15 of the M40, and Ferrybridge next to the A1(M) and M62 interchange. Our warehousing space has an overall footprint of some 130,000 square feet which is continually expanding.
